# SCRIMSHAW 1970

Southeastern Massachusetts University  
North Dartmouth, Massachusetts

DEDICATION TO ACADEMIC FREEDOM . . .

“That community is already in the process of dissolution where each man begins to eye his neighbor as a possible enemy, where nonconformity with the accepted creed, political as well as religious, is a mark of disaffection; where denunciation, without specification or backing, takes the place of evidence; where orthodoxy chokes freedom of dissent; where faith in the eventual supremacy of reason has become so timid that we dare not enter our convictions in the open lists, to win or lose.

The mutual confidence on which all else depends can be maintained only by an open mind and a brave reliance upon free discussion.”

New York Supreme Court Justice Learned Hand

Convocation of the Board of Regents

University of the State of New York

October 24, 1952

## PRESIDENT'S MESSAGE

DOCTOR JOSEPH LEO DRISCOLL, President

The Class of 1970 graduates in the year marking the 75th Anniversary of the University — more correctly, of the founding of the University's predecessor institutions.

You graduate during a time when the vast majority of our society is agonizing over great and divergent social, political, economic and educational issues. All of you are a part of this agonizing whether your behavior is active or passive, conventional or radical. You will all continue to be a part of this nation's groping for new and better ways by which human beings can live happily and productively together.

Some, perhaps, will persist in their incessant demands to tear down authority and our established institutions. I hope the vast majority of you will have a sufficient sense of commitment, together with the perseverance, to seek honest and constructive change through methods which respect the rights of all others, and that you will have sufficient patience to insure your being able to truly hear and understand the points of view of others who may not agree with your point of view.

For those of you who somehow just haven't been involved, I urge you to become involved, constructively involved and persistently involved. Should enough of you follow this course, this country will be the better for it and this University's existence will be the more justified.

Should you, through apathy, or simply by not really knowing what the issues are and where the truth lies, not become truly involved, or through your activities pervert democratic processes and institutions, then the University and all of us connected with it will have helped to do a serious disservice to a nation and a society that deserves your best constructive efforts and has a right to claim your energies in its quest to attain its ideals.
